

## RESTORED ORANGE INDUSTRY.

A Feeling of Confidence Again Manifest  
Throughout the State.

From the Florida Industrial Record.

Probably never in the history of this country has man's struggle and mastery over nature been demonstrated to a greater extent than in Florida. When the chill blast blew out of the northwest in 1894-5 and spread its fingers over the peninsula with a severity that had not been experienced since 1836, it seemed at the time that such a calamity would drive all of the hope from the orange grower, and that the industry was doomed, but the thirty or forty thousand people engaged in the pursuit pulled themselves together, set their teeth firmly against the future and with heroic resolve commenced building on their ruins with a persistency unequalled in the world. The continued cold winters following the blizzard of '95 seemed to have won the fight for a time, but with a steady, unyielding nerve the grower worked on, and what is the result as the season closes for the blooming and growing season of 1901?

The old orange centers are coming with galloping speed to the front again. Orange Lake, Panasofkee and Lake Harris, once the centers of pioneer production and the headquarters of grade and quality, are bright with the prospect of rehabilitation. The trees never appeared more thrifty or beautiful in the history of orange growing, and the crop that will ripen in November will go up into the thousands of boxes. Other sections, too, are coming rapidly back into the orange fold. Osceola county shipped more fruit than ever in its history; Indian river is assuming the old-time boast of the finest fruit in the world; Volusia says that her rank shall not be behind; Orange, it is claimed, will surprise the natives, and so it goes throughout the old orange belt; and this era, combined with the increased acreage of Manatee, Polk, Lee and Dade, will swell the crop into old-time proportions, and at the close of the season of 1902 4,000,000 boxes is a fair estimate.

The mildness of our winters for the next twenty years has been predicted, a prophecy made in the light of history and tradition. It has been shown beyond the possibility of dispute that when excessive rains fall over Florida during the months of April, May and June and then are followed up with the usual fall average, it is nature's prophecy of mild winters.

Spanish records go to show that such was the case in about the year 1778, when rains filled the ponds to overflowing. This date was followed by many mild winters up to about 1818. The first part of the century being dry, that brought on a number of cold winters. Spring rains again commenced and mild winters ensued up to 1836, followed by a series of dry seasons on up to 1872, when the ponds on the hill-tops were again filled to overflowing, as was the case on up to 1881, and we had mild winters on up to 1885, and then cold winters set in that culminated in the great freeze of 1894-5. The seasons of 1900 and 1901 swung back to the old-time meteorological era, when for the first time since the '70s the ponds are full of water and the ground thoroughly saturated with moisture.

The Indians have a tradition that early spring rains indicate a warm winter. No matter what may be the contention of science there can be no question that an excess of moisture in the ground proves a defective medium against cold, and a blanket of vapor causes to bound upward the cold winds and dissipates the biting effect of the frost in a still cold.

The Record predicts mild winters for a number of years. By mildness we mean the absence of destructive frosts to orange trees, and this will apply to a section as far north as the Alachua line in the old orange belt.

## A Raging, Roaring Flood

Washed down a telegraph line which Chas. C. Ellis, of Lisbon, Ia., had to repair. "Standing waist deep in icy water," he writes, "gave me a terrible cold and cough. It grew worse daily. Finally the best doctors in Oakland, Neb., Sioux City and Omaha said I had consumption and could not live. Then I began using Dr. King's New Discovery and was wholly cured by six bottles." Positively guaranteed for coughs, colds and all throat and lung troubles by Wilson & Son and J. B. Screven. Price 50c. 5

## Good Singing at the Pan.

Mr. F. R. Rossell, superintendent of advertising department of the Pan-American, says:

"One of the midway features has afforded me so much real pleasure that I feel impelled to appeal to the people who love sweet simple music, such as four people out of every five we meet do love, to hear it. It is the singing of the ten or twelve men in the Hawaiian theater and of the male quartette in the Hawaiian Volcano next door. They sing in their native tongue, and every man plays an instrument. I miss no opportunity of hearing them, and their work is one of the few midway attractions about which there seems to be no two opinions.

"I have no interest other than to help a good thing along, and to be instrumental in directing people where they are going to be pleased. I certainly know of no other vocal music on the exposition grounds to equal it."

## NOTICE.

NOTICE IS HEREBY GIVEN that the following described lands will be sold at public auction on the 2nd day of September, 1901, in front of the door of the council chamber at Titusville, Brevard county, Florida, or so much thereof as will be necessary to pay the amount due for taxes herein set opposite to the same, together with costs of such sale and advertising:

OWNER.	DESCRIPTION OF LAND.	Section.	Township S.	Range E.	Acres.	Amount of Taxes and Costs.
M. Goldsmith	Part of west 1/4 of southeast 1/4, described in deed book C, page 385	33	21	35	48	\$5 46
